IMPORTANT FACTS

This is only a brief summary of important information about VEKLURY. This does not replace talking to your healthcare provider about your treatment.

ABOUT VEKLURY

VEKLURY is a prescription medicine used to treat COVID-19 in adults and children at least 12 years old and weighing at least 88 pounds requiring hospitalization.

- To determine if VEKLURY may be an option for you, talk to your healthcare provider.

Do not take VEKLURY if you:

- Are allergic to remdesivir or any of the other ingredients in VEKLURY.

POSSIBLE SIDE EFFECTS OF VEKLURY

VEKLURY may cause serious side effects, including:

- **Allergic reactions.** VEKLURY can cause allergic reactions during or after infusion. Tell your healthcare provider right away if you get any of the following symptoms: changes to heart rate, rash, fever, nausea, sweating, shortness of breath, wheezing, or swelling of the lips, face, or throat.
- **Increase in liver enzymes.** Increases in the amount of liver enzymes are common in people who have received VEKLURY and may be a sign of liver injury. Your healthcare provider will do blood tests to check your health before and during treatment and may stop your treatment with VEKLURY, if you develop new or worsening liver problems.

The most common side effect observed with VEKLURY was nausea.

These are not all the possible side effects of VEKLURY. Tell your healthcare provider right away if you have any new symptoms while receiving VEKLURY.

Your healthcare provider will need to do tests to monitor your health before and during treatment with VEKLURY.

BEFORE TAKING VEKLURY

Tell your healthcare provider all your medical conditions, including if you:

- Have or have had any allergies, kidney or liver problems, or any serious illnesses.
- Are pregnant or breastfeeding: It is not known if VEKLURY can harm your unborn baby or be passed to the baby in breast milk. If you are pregnant or breastfeeding, discuss your options and specific situation with your healthcare provider.

Tell your healthcare provider about all the medicines you take:

- Tell your healthcare provider all prescription and over-the-counter medicines, vitamins, and herbal supplements you take.
- **Especially tell your healthcare provider if you are taking any medicines that contain chloroquine phosphate or hydroxychloroquine sulfate.**
- Ask your healthcare provider or pharmacist about medicines that should not be taken with VEKLURY. Some medicines may affect how VEKLURY works.

HOW IS VEKLURY GIVEN?

- VEKLURY is given through a vein by intravenous (IV) infusion, one time each day for up to 10 days, as determined by your healthcare provider.
